

Dear Resident:

This is to make you aware that Duke Energy will be working on their gas transmission line between US 27 and Jude Point. This letter is to inform you that Duke will start their **construction on Winters Lane, weather permitting, the week of September 03, 2018 and be completed by week of September 22, 2018.**

Duke has informed us that construction for this project may require the street to be closed during various times of the day; if this is required proper road signage will be posted. Every effort will be made to avoid any road closures during morning and evening rush hours. Rain during the days prior to or during construction will add time to the project so your patience and understanding are appreciated. Every effort will be made in an attempt to keep you updated as to when and if dates need to be moved or if delays are encountered.

We believe that the stated construction plans coupled with YOUR enhanced caution / safety awareness and cooperation will allow this construction to proceed in a safe and efficient manner.

Please do not hesitate to contact Brad Seiter Duke Energy Project Manager at 859-466-6690 or as always you can contact me or our office staff at 859-441-9604 should you have any questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Taylor', is written over a light blue horizontal line.

Steve Taylor
